

Mechanic I – Electromechanical Equipment Mechanic

Pay Band: \$20 – \$26 per hour

Job Summary

Launch your career in industrial electromechanical repair. As a Mechanic I, you'll work hands-on with motors, pumps, and gearboxes while learning from experienced senior mechanics in a fast-paced shop environment.

Experience & Qualifications

High school diploma or equivalent required. 1–5 years of hands-on mechanical, industrial maintenance, or technical experience preferred. Trade school or apprenticeship experience is a plus.

What You'll Do

- Assist with disassembly, inspection, cleaning, and reassembly of electromechanical equipment
- Perform basic repairs and component replacements under supervision (bearings, seals, brushes, fans)
- Clean and prepare components using parts washers, steamers, and other shop equipment
- Read and follow job cards, repair instructions, and safety procedures
- Assist with basic testing of AC and DC equipment
- Maintain a clean, organized, and safe work area
- Accurately complete job paperwork and documentation
- Support senior mechanics and shop personnel as needed

Equipment You'll Work On

AC Motors, DC Motors, Blowers, Pumps (submersible, split-case, close-coupled), and Gearboxes.
